

## **Vehicle Service Management System (VSMS)**

- As a Company Director, I want to be able view my VSMS on the website so that I can keep our company fleet operation running smoothly.
- As a company vehicle technician, I want to be able to add a car with its VRM (Vehicle Registration Mark) to the VSMS so that I can register the work on the vehicle.
- As a technician, I want to add a description of the work that has been carried out on a vehicle so that Company can keep the record.
- As a technician I want to be able to add the cost of the repair to the VSMS so that Company can track the expenses.
- As a company vehicle management team manager, I want to be able to view the list of services with the details of the work and the cost of the service so that I can create reports.
- As a company vehicle management department, we want to be able to search the repair by its unique ID or be able to view them all so that we can search and locate faster.
- As a general user, we want to be able to update the description, VRM or the cost of the work from the system so that it has an update function.
- As a general user, we want to be able to search the VRM to get the whole list of the work that has been done for a specific vehicle so that user can generate a cost or service report.
- As a general user, we want to be able to delete the work that has been done for the vehicle so that we can delete the older record or any vehicle that is no longer in our fleet.
